

the Circle

map of life

STICHTING 11:11

‘the Circle - map of life’

The Circle is a universal energetic model that gives insight into your spiritual world, the origin of everything that manifests in your physical world. The Circle is constructed as an analogue clock. Each of the twelve positions represents a character and has a positive and a negative side. The thirteenth position in the middle is the ultimate position of the mind, the Zero-point, where (re)birth takes place.

Within your Circle you will experience the positive effects of the twelve characters, oneness. Here everything is in harmony. Outside the 333 border, you will experience the negative effects of the twelve characters, the duality, the chaos and the greed. The line 666 is the extreme border, materialism, also called "the antichrist" or "the beast", all referring to the apocalyptic 'end of the material world'. The lessons of life are experienced between Zero-point and 666.

Seen from the side, the Circle is a mountain that must be climbed after our “free” fall. By climbing higher we will increase our awareness until we finally reach the top. From this point we can leave the Earth's spheres and go ‘home’.

Find out which of your twelve characters are negative. By changing your attitude you can enter your safe Circle and (re)connect the center, Yourself.

1 Purpose

This energy helps to focus the ultimate goal, the top of your mountain, gateway to the 5th dimension. The negative side of this energy makes you focus on lower materialistic goals and will result in feelings of need and even addiction.

2 Challenge

An energy that encourages you to grow spiritually. The negative aspect of this energy makes you take things for granted without spiritual growth.

3 Service

By serving others you will learn to be serviceable to yourself without losing yourself. The negative side of this energy makes you focus on others and sacrifice yourself.

4 Form

This energy expresses the aesthetic value. Your attitude reflects this energy in a positive or negative way like 'the flower or the bullet'.

5 Radiation

Your own energy system radiates stronger or weaker due to your own attitude. When you follow or adore someone else you give away your own radiance.

6 Equality

Every soul on Earth has the same purpose; integrating the twelve universal characters. That goal makes us all equal. The negative side of this energy is expressed in a hierarchical system, looking down or looking up to others.

7 Attunement

The positive side of this energy connects you to Yourself in the middle of your Circle. The negative side of this energy causes adaptation to others without getting to know yourself.

8 Integrity

If you live your life according to the truth of your own intuition it will reflect the positive side of this energy. If you do not express your own opinion or being stubborn by holding on to your own 'truth', you will be caught by illusions.

9 Intention

It's an idea, a mental plan that allows you to make changes in your own environment. The positive effect will lead to a rich awareness. A negative effect will lead to materialism and a limited awareness.

10 Manifestation

The positive side of this energy enables you to take and maintain your own space, from Zero-point to the border of 333. The negative side of this energy will lead to suppression and occupation of the space of others.

11 Liberation

This energy allows you to go your own way without being imposed by anyone. The negative side of this energy results in limitations in freedom of yourself and others.

12 Cooperation

This energy is expressed in a positive way when the whole is bigger than the sum of all parts: $1 + 1 = 3$. The negative side of this energy is expressed in competition and battle.

13 Presence

The thirteenth position in the center of the Circle is Presence, the Zero-point. From this position you are pure intuition and you are able to use all twelve characters. It is the love for Yourself to serve a bigger picture.
